

## Work report and year planning of Non Government Organisation "Lake Poso"

- 2001-2006 Distribution of collected reading glasses and hearing aids  
Distribution of scabies medication for the skin disease of dogs  
Distribution of home made wooden riding horses for children in kindergarten around the lake  
New zinc roof on a primary school with paint for roof and fence.
- 2006-2009 Support three children (Masni, Jongli and Kristopan) of poor families to enable the children to go to primary school. Inclusive payment of books, writing material, three different uniforms per child per year and tuition.
- 2009-2012 Support three children (Masni, Jongli and Kristopan) of poor families to be able to go to secondary school. Inclusive of payment of books, writing material, three different uniforms per child per year and tuition.
- Oct 2008 In 10 days time check-up of 200 patients of whom 67 patients received a surgical operation by a Dutch surgical team. From Harelip (incl Dandy see picture last page) and severe burn wounds till skin cancer. Reconstructive surgeon Hans de Bruijn, Anaesthesiologist Marten van Wijhe and operation room assistant Ida Burkink.
- 2009 Installation of water pipes, 2 washbasins and three tabs for clean water in a kindergarten.
- 2010 Preparations (collect donations and communicate a lot) for operation on Kristian Kampu. A child with Meningo Encephalocele Anterior=MEA (a frontal hernia of the skull through which brainmatter leaks) in a hospital in Jakarta. Kristian is one of the patients checked by the Dutch surgeon and local doctors in Tentena but he has a defect too delicate and too dangerous to operate on in this local operating room.
- MarchApril2011 To Jakarta with Kristian and his father for pre checks and operation on his MEA= Meningo Encephalocele Anterior. After the first operation Kristian is doing bad and it turns out he is a hydrocephalus patient as well and needs a drain from his brain to his belly (a vp shunt). This operation is done as well.
- 5-16 Sept 2011 In 9 days time check-up of 297 patients of whom 83 patients received a surgical operation by our Dutch surgical team. From Harelip and severe burn wounds till skin cancer. reconstructive surgeon Hans de Bruijn, Anaesthesiologist Marten van Wijhe, assistant anaesthesiologist Ernst den Ouden and operation room assistant Janneke Schuijzeman. See [www.tandobone.net](http://www.tandobone.net)
- 2012 Continues support of students.  
Continue collecting financial support for the next operation in the year
- 2014 Start administration, research, communication, coordination and collecting for our next projects:  
upgrading of a kindergarten with teaching material, books, learning toys  
transport of second hand computers from the Netherlands turns out to be not feasible.  
Our reconstructive surgical team came to operate again! 430 patients assessments and minor treatment and 85 operations.
- 2015 Bring children to the dentist to drill adult teeth with caries instead of pulling the tooth.  
Finance one young man going to university to learn English.
- 2016 Distributed reading glasses amongst the elderly
- 2017 Search for surgical team for Umayyah who has an Ameloblastoma mandibula left, or benign bone cancer of the jaw.  
organized installation of wifi connection in primary school  
installed 13 computers, made by Technical Highschool IT Eklesia in Tentena, in local primary school Philadelphia.
- 2018 computer and classroom repairs and classroom safety installation
- 2019 Planning to order more computers for other schools with wifi connection to improve education for children
